

# How QualMap helps a leading protein supplier to automate data quality checks, consolidation & reminders throughout its network of plants ?

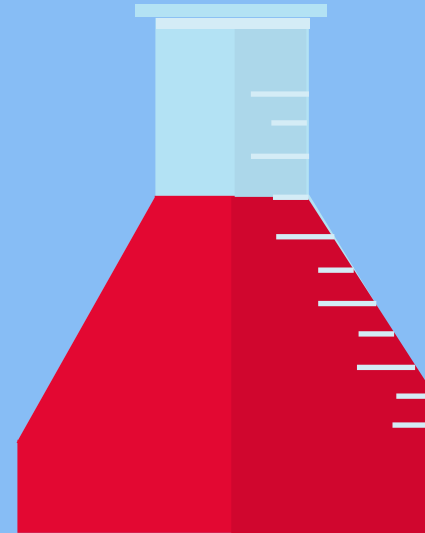

## QUALMAP

### Situation

A leading protein supplier, is servicing more than **36,000** quick-service, major food service, and retail outlets **globally**.

Analytical testing is part of their practice for Food Safety and Quality.

However, the **data was inconsistent from facility to facility** and required manual compilation to gain insights. Also, the company needed **real-time visibility** in their **15 manufacturing facilities world-wide** to ensure consistency across facilities and **adherence** to their customers' and internal programs.

*"We have a passion for **excellence and strive to provide only the highest quality service and products to our customers. We bring attention to detail to every step of production, We use real-time data to monitor and maintain quality every step of the way."***

Quality Manager

### Solution

The leading protein supplier partnered with Merieux Nutrisciences' Digital solutions to **integrate, standardize, and visualize** their analytical data.

Today, their data from **Raw Material to Finished Product**, for both **US & APMEA region**, is integrated into **QualMap's executive dashboard**.

Corporate Quality and Safety leaders monitor and improve their facilities' performance.

### Benefits

**4 - 6 hours**  
saved per week by eliminating manual compilation

Visibility to over  
**3 100**  
real time test results  
**Per Week**

**Reducing product loss and risk of recalls**
